

eDiscovery Advantage, Volume 6, Issue 1

AUGUST 2024

The Winston & Strawn eDiscovery and Information Governance Practice is pleased to provide *eDiscovery Advantage*, our newsletter providing summaries and analysis of recent decisions and developments in the law that have an impact on the arenas of e-discovery, information governance, and privacy.

This edition provides insights about key trends from the first half of 2024, including the continued importance of early and effective preservation of mobile messaging data and the importance of practical considerations to courts analyzing tricky questions about the production of “modern attachments” and “hyperlinked documents.” We hope you find these insights and summaries helpful in your planning and practice.
